## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "*means*" and "*said,*" *should be avoided*. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by *this invention*," "The disclosure describes," etc.

### *Claim Objections*

2. Claims 20 and 23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims cannot depend on other multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims 20 and 23 have not been further treated on the merits.

### *Election/Restrictions*

3. Applicant's election species of figure 1 in the reply filed on 11/14/2005 is acknowledged.

### *Allowable Subject Matter*

4. Claims 1-19, 21-22, and 24 are allowed.

Art Unit: 2613

5. The following is an examiner's statement of reasons for allowance:

The cited prior art does not particularly teach a transmission apparatus for video information characterized an input part for inputting video information transmitted by a central processing unit; a level information generation part for generating level information of each pixel on a screen based on at least said video information; a memory part for storing the level information of each pixel in the entire region of the screen: a region extraction part for extracting a changed region which is a region on the screen including pixels related to said video information; an update region level information generation part for generating level information of each pixel in said changed region based on, at least, either the level information of each pixel generated by said level information generation part or the level information of each pixel stored in said memory part; a compression part for compressing the information amount of level information of each pixel in said changed region ; and a communication part for transmitting position information of said changed region and said compressed level information as claimed in claims 1 and 10 (see figure 1 of the specification of the present invention).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung Vo whose telephone number is 571-272-7340. The examiner can normally be reached on Monday-Friday.

Art Unit: 2613

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on 571-272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
